Q2 2019

Our South African operations were suffering from bad market conditions and challenging business environment. The Specialty Alloy segment performed well, although the market prices have also weakened substantially. Afarak is well placed to take immediate advantage of any improvement in our macroeconomic environment and remains committed towards sustainability and improved performance going forward.

### QUARTER TWO 2019 HIGHLIGHTS

- Revenue for the second quarter of 2019 decreased by 23.6% to EUR 41.5 (Q2/2018: 54.3) million;
- Processed material sold decreased by 18.7% to 21,082 (Q2/2018: 25,929);
- Tonnage mined decreased by 44.9% to 83,161 (Q2/2018: 150,852) tonnes due to lower mining activity at Stellite mine and no mining activity at Mecklenburg mine;
- The Group's EBITDA significantly lower at EUR -8.1 (Q2/2018: 1.2) million and the EBITDA margin was -19.6% (Q2/2018: 2.2%);
- EBIT was EUR -31.1 (Q2/2018: -0.4) million, with the EBIT margin at -74.9% (Q2/2018: -0.8%);
- Profit for the period totalled EUR -21.6 (Q2/2018: -2.7) million, negatively impacted by an impairment write-down related to the Mogale business of EUR 20.8 million, which was partly offset by the gain on change in control of Synergy Africa Ltd, acquiring 100% shareholding, amounting to EUR 7.1 million;
- Cash flow from operations stood at EUR -1.1 (Q2/2018: -4.8) million;
- Net interest-bearing debt after deducting liquid funds amounted to EUR 30.2 (10.5) (31 March 2019: 11.9) million;
- Cash and cash equivalents at 30 June totalled EUR 6.1 (30 June 2018: 5.5) (31 March 2019: 10.5) million.

### FIRST HALF 2019 HIGHLIGHTS

- Revenues decreased by 20.8% to EUR 82.8 (H1/2018: 104.5) million compared with the year earlier, due to lower selling prices and lower sales volumes as a result of a weakening economy;
- Profitability was primarily impacted by the negative performance in the FerroAlloys segment, due to lower market prices and the adverse conditions that the plants faced in South Africa;
- EBITDA for the first half of 2019 contracted compared to the equivalent period in 2018, to EUR -12.9 (H1/2018: 0.5) million, the main impact coming from the negative performance of the FerroAlloys segment;
- Profit for the first half of 2019 totalled to EUR -29.2 (H1/2018: -4.6) million.

## MARKET SENTIMENT FOR THE THIRD QUARTER 2019

The Global economy continues to face a turbulent future, with uncertainties in US/Sino relationships and BREXIT overhanging Europe. It remains impossible to forecast prices or volumes with any accuracy.

The third quarter is typically driven by a seasonal summer slow-down in Europe where demand decreases. Since the end of Q2, we have used the summer shut down in Germany to carry-out a maintenance shut-down of 6 weeks. Additionally, in South Africa expensive winter energy tariffs came onstream in June, followed by seasonal maintenance shut-downs. We have temporarily closed furnaces P2 and P3 and replaced the roof of furnace P1. The third quarter is expected to see a weaker market demand and prices for both the FerroAlloys and the Speciality Alloys segment have already decreased. In the FerroAlloys segment the contraction of the ferrochrome benchmark to USD 104 c/lb, from USD 120 c/lb in quarter two, led management to take the measure described above. Inventories were written down in quarter two to reflect lower prices of quarter three.

## CEO GUY KONSBRUCK

“The challenges faced by Afarak during 2018, continued in the first half of 2019.

In South Africa, the bad financial performance of the FerroAlloys segment continued, which heavily impacted the Group’s results. The sales volumes were below those experienced in Q2 2018 as a result of the global economic slow-down. Extremely low charge chrome benchmark prices caused the revenue to decrease further. The irregular availability and the high cost of energy resulted in a major difficulty in achieving good, reliable performance in our Mogale smelter. As a consequence, we cut production by half and concentrated on production on the DC furnace, as well as the converter. We also changed key management and started a retrenchment process to lower fixed costs. The whole South African industry is suffering heavily from the high energy prices.

The Speciality Alloys segment was also impacted by lower selling prices of low carbon ferrochrome. During the quarter, management decided to extend the summer maintenance shut-down by two weeks at our EWW plant in Germany, to manage levels of inventory. The mines in Turkey continued to perform well.

The charge chrome benchmark price for quarter three has dropped to an even lower level of USD 104 c/lb, from USD 120 c/lb in quarter two, being the lowest price in three years. With such low selling prices, together with seasonal effects, we expect quarter three to be another challenging quarter.

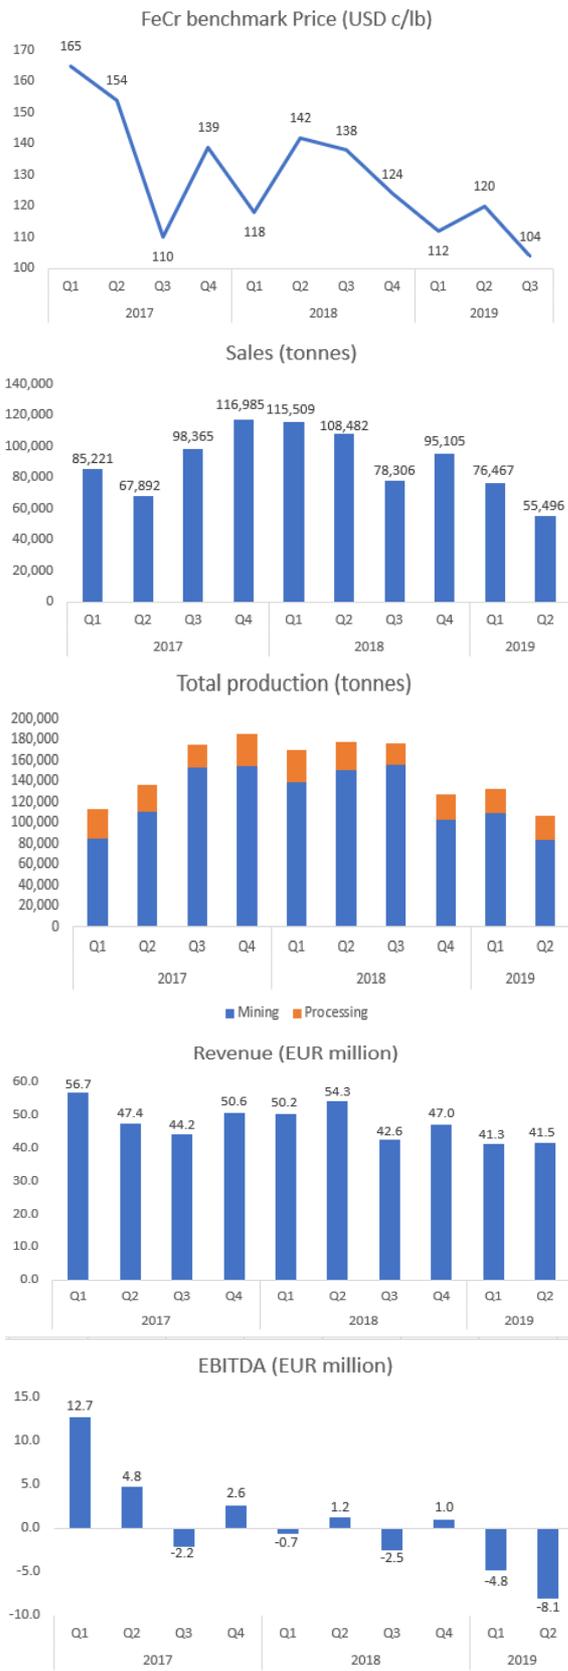

Like others in our industry, we are being badly affected by external, global economic issues and some specific issues affecting anyone in South Africa.

As of this quarter we have control over all the mines in our South African FerroAlloys business; our Mogale smelter has proven it can flexibly handle multiple product lines and has a record of good customer satisfaction. Like others in our industry, we are being badly affected by external, global economic issues and some specific issues affecting anyone in South Africa.

Our vertically integrated Speciality Alloys business in Germany and Turkey has ample reserves, world-class laboratory facilities and proven processing capability.

We are as well placed as we can be to take immediate advantage of any improvement in our macroeconomic environment.”

# OVERVIEW OF RESULTS

## MARKET OVERVIEW

Global demand for stainless steel increased by 3.1% in quarter one 2019 and is expected to decrease in the third quarter. Compared to a year earlier, ferrochrome prices remained generally subdued. Following the increased benchmark in the second quarter to USD 1.20/lb, benchmark dropped to USD 1.04/lb in the third quarter. In the chrome ore market the excessive supply of chrome ore led inventory levels at Chinese ports to increase during the quarter, and as a result South African Chrome ore prices reduced by around 20.0%. Even the low carbon ferrochrome market started showing signs of over-supply as demand from end-users reduced mainly driven by automotive sector as well as uncertainty with the trade war between the US and China.

## Q2 2019 COMPARED TO Q2 2018

Total Group sales dropped by 29.6% to 76,379 (108,482) tonnes. The decrease in sales volumes together with lower selling prices led revenues to decrease by 23.6% to EUR 41.5 (Q2/2018: 54.3) million. The decline in production of 39.6% led to unabsorbed overheads which impacted the results for the quarter. EBITDA declined to EUR -8.1 (1.2) million. The FerroAlloys segment continued having a significant impact on the Group's results with production costs exceeding selling prices which led to inventory write down amounting to EUR 4.0 million in the second quarter. The Speciality Alloys was negatively affected by the shutdown of two weeks at EWW plant. Profitability was also negatively impacted by an impairment write-down on goodwill and other assets related to Mogale business of EUR 20.8 million, inventory theft at Mogale of EUR 1.2 million, which was partly offset by the accounting gain on acquisition of Synergy Africa Ltd amounting to EUR 7.1 million.

## FIRST HALF 2019 COMPARED TO FIRST HALF 2018

Revenues reduced by 20.8%, and profitability was affected by the negative performance of the FerroAlloys segment, which was driven by the interplay of lower market prices and production inefficiencies that the plants faced in South Africa. EBITDA for the first half of 2019 contracted, compared to the previous year to EUR -12.9 (0.5) million.

#### PERFORMANCE COMPARED TO QUARTER TWO 2018

- Sales volumes of processed material decreased marginally by 0.4% during quarter two;
- Revenue for the quarter decreased by 5.6%, to EUR 24.9 (26.4) million mainly due to lower selling prices of low carbon ferrochrome during the quarter, as well as a change in sales mix;
- EBITDA retracted to EUR 2.2 (3.9) million, this was mainly driven by the decrease in sales prices; higher cost of material sold that came from the previous quarter; lower margins from speciality; as well as the two weeks of shutdown cost incurred at EWW;
- During the quarter cost of production improved as a result of reduced raw materials costs. This will be an important factor in the coming quarter to counter balance the negative impact of the declining sales prices and the lower sales;
- Production of processed material increased marginally by 2.4%. In June 2019 EWW stopped production two weeks earlier than originally planned to reduce stock piles;
- Mining activity at TMS increased by 11.7%, mainly due to increased mining activity at Tavas.

#### PERFORMANCE COMPARED TO FIRST HALF 2018

- Revenue decreased during the first half of 2019, when compared to the same period of last year. Despite the strengthening of the US dollar and average selling prices being at the same level as last year, lower sales volumes were recorded during the reporting period;
- Production increased slightly by 3.9% mainly due to the increased mining activity at Tavas mine, which was offset by reduced production at the EWW plant in Germany;
- The above factors caused EBITDA to decrease by 37.0% to EUR 4.2 (6.6) million, and EBIT to decrease by 48.1% to EUR 2.9 (5.7) million.

### PERFORMANCE COMPARED TO QUARTER TWO 2018

- Revenue and sales volumes decreased by 40.2% and 26.8% respectively due to lower sales volumes and lower benchmark prices;
- EBITDA was negatively impacted at EUR -8.5 (-1.1) million. This was mainly driven by weak ferrochrome prices; inefficiencies in production; under absorption of overhead costs as a result lower production; and an inventory write-down of Mogale material amounting to EUR 4.0 million in relation to a lower benchmark prices of expected sales in the third quarter of 2019, and EUR 1.2 million in relation to inventory theft at Mogale. Management have taken action and introduced internal control measures to mitigate this risk;
- Production decreased to 81,642 (153,795) tonnes in the second quarter of 2019, representing a significant decrease of 46.9%, when compared to the same period in 2018, due to no mining activity at Mecklenburg mine and Mogale plants P2 and P3 being switched off during June 2019;
- Profitability was further impacted by an impairment related to the Mogale business of EUR 20.8 million, which was partly offset by the gain on change in control of Synergy Africa Ltd, acquiring 100% shareholding, amounting to EUR 7.1 million.

### PERFORMANCE COMPARED TO FIRST HALF 2018

- Contraction in sales volumes and lower ferrochrome benchmark prices contributed to a fall in revenue for the first half of 2019 to EUR 35.5 (52.7) million;
- Production decreased significantly by 36.7% to 189,607 (299,425) tonnes;
- Such factors together with higher cost of production and inventory write-down of Mogale material, negatively affected EBITDA to EUR -14.0 (-3.3) million;
- Profitability was further impacted by an impairment on goodwill and other assets related to Mogale business of EUR 20.8 million, which was partly offset by the gain on change in control of Synergy Africa Ltd, acquiring 100% shareholding, amounting to EUR 7.1 million.

### BALANCE SHEET, CASH FLOW AND FINANCING

The Group's total assets on 30 June 2019 stood at EUR 253.3 (262.8) (31 March 2019: 251.2) million and net assets totalled EUR 131.6 (165.6) (31 March 2019: 145.7) million. During the quarter, currency movements had a slight effect on Afarak's balance sheet, with the translation reserve moving by EUR -0.7 (-0.9) million. The Group's cash and cash equivalents, as at 30 June 2019, totalled EUR 6.1 (5.5) million (31 March 2019: 10.5). Operating cash flow in the second quarter was EUR -1.1 (-4.8) million.

The equity ratio was 51.9% (63.0%) (31 March 2019: 58%). Afarak's gearing at the end of the second quarter increased to 23.0% (6.3%) (31 March 2019: 8.2%), driven by the expansion in the interest-bearing debt to EUR 36.4 (16.0) (31 March 2019: 22.4) million.

Major changes in Balance sheet relate to the acquisition of Synergy Africa as explained in the purchase price allocation, and changes resulting from the impairment test review of South African minerals processing.

## INVESTMENTS, ACQUISITIONS AND DIVESTMENTS

Capital expenditure for the second quarter of 2019 totalled EUR 1.1 (2.8) million, with the major part being TMS where it continued construction of the new fines tailing plant at Kavak mine.

Afarak acquired 49% balance of Synergy Africa Ltd joint venture. Afarak now holds 100% of Synergy Africa Ltd and the Joint Venture agreement was terminated. Afarak acquired full control over its mining assets and is now consolidating Synergy Africa as a subsidiary as from 1st April 2019.

The preliminary purchase price allocation of the acquisition is presented below. The figures on the table represent the 100% of the assets and liabilities of Synergy Africa which is consolidated into Afarak Group's financial statements.

Intercompany Loans are now eliminated and external loans are now consolidated.

Fair valuation of former Synergy Africa joint venture resulted in a EUR 7.1 million accounting gain.

During the quarter Afarak acquired a further 23% of the shares in Zeerust Chrome Mine, in exchange for total consideration of two million shares in Afarak Group Plc. Afarak now holds 74% interest in the company.

## IMPAIRMENT TESTING

Afarak Group has carried out impairment testing on goodwill and other assets for the South African minerals processing business (Mogale Alloys) cash generating unit, which has ferroalloys smelting operations with four furnaces as of 30 June 2019.

At end of 30 June 2019 an impairment of EUR 20.8 million was recognised.

|                                   |                   |
|-----------------------------------|-------------------|
| EUR million                       | <b>30.06.2019</b> |
| Goodwill                          | 12.5              |
| Other assets and liabilities, net | 46.0              |
| Carrying amount                   | <u>58.5</u>       |
| Recoverable amount                | <u>37.7</u>       |
| Impairment                        | <u>20.8</u>       |

The pre-tax discount rates applied in the impairment testing was of 21.8%.

Impairment test results were as follows:

| Cash generating unit              | Goodwill (MEUR), pre-testing | Goodwill (MEUR), post-testing | Carrying amount (MEUR), pre-testing | Conclusion |
|-----------------------------------|------------------------------|-------------------------------|-------------------------------------|------------|
| South African minerals processing | 12.5                         | 0                             | 58.5                                | Impairment |

Key background and assumptions used in the cash flow forecasts of the impairment testing process are summarised in the following table:

| Cash generating unit              | Sales volume   | Sales prices   | Costs   |
|-----------------------------------|--|--|---|
| South African minerals processing | Metal alloys:<br>91,000 mt/a<br><br>Assumption made:<br>P1 will operate throughout the period;<br>P2 and P3 will start to operate as from Q4 2020;<br>P4 will not be operating during the period | Forecast based on 10 year price average adjusted for inflation | Raw material costs generally change in line with sales price; Electricity cost was assumed to be higher than inflation, while other costs growing at inflation rate |

Moreover, the USD/ZAR foreign exchange rate affects significantly the testing of the South African minerals business. The foreign exchange rate used in the test was 14.2.

## PERSONNEL

At the end of the second quarter 2019, Afarak had 1,035 (929) employees. The average number of employees during the second quarter of 2019 was 1,059 (932). The increase in workforce is mainly driven by the acquisition of Synergy Africa by 98 employees.

## UNALLOCATED ITEMS

For the second quarter of 2019, the EBITDA from unallocated items remained stable compared with last year EUR -1.7 (-1.6) million. EBITDA included EUR -0.6 (-0.3) million, relating to net operating expenditure incurred by the Group in Magnohrom.

## SUSTAINABILITY

The health and safety of our employees across business units remains a key central focus. No fatalities were recorded during the quarter under review.

The improvement process that was spearheaded by local management at Mogale is continuing and has led to tangible improvements as no injuries were reported during the quarter. The management continues to focus on improving health and safety practices in the TMS mines in Turkey, given the fast expansion of the unit in terms of employees and assets.

Our efforts with local communities continues also this quarter, with the subvention of funds to support local projects and infrastructural development. Our aim remains to improve the daily lives of the communities where our investments resides. Our community relationship team continues with its mission to invest directly in such communities.

From the environmental perspective, investments were made in the plants in Turkey in terms of water conservation and management. Installing a 2.8MW heat recovery unit at Mogale is in its final phase, which will reduce CO2 emissions and help reduce electricity costs too,

## RISKS & UNCERTAINTIES

Afarak's financial performance is dependent on the general market conditions of the mining, smelting and minerals processing business. Global stainless-steel demand also carries direct influence on the company. In particular, the chrome ore prices as well as the benchmark settlements have been extremely volatile in the past. This situation is likely to continue going forward.

Changes in foreign exchange rates, if adverse, could have a negative impact on the Group's

profitability, in particular changes in US Dollar/South African Rand. To better manage its foreign exchange US Dollar/South African Rand exposure, the Group constantly evaluates its current and potential exposures and the need to enter into forward contract arrangements. The Group continuously assesses its working capital to minimise the time during which the Group is exposed to exchange movements and to ensure that it has sufficient funds to meet its liabilities.

Afarak's processing operations in Germany and South Africa are intensive users of energy, primarily electricity. Fuel and energy prices globally have been characterised by volatility and cost inflation. In South Africa the majority of the electricity supply, price and availability are controlled by one entity, Eskom. Increased electricity prices and/or reduced, or uncertain electricity supply, or allocation may negatively impact Afarak's current operations, which could have an impact on the Group's financial performance.

## CORPORATE GOVERNANCE

### ANNUAL GENERAL MEETING

The Company's Annual General Meeting ("AGM") was held on 25 Jun 2019. The AGM adopted the financial statements and the consolidated financial statements and discharged the members of the Board of Directors and the CEO from liability for the financial period 2018.

## FORMULAS FOR FINANCIAL INDICATORS

Financial ratios and indicators have been calculated with the same principles as applied in the 2018 financial statements. These principles are presented below.

Return on equity, % = Profit for the period / Total equity (average for the period) \* 100

Return on capital employed, % = (Profit before taxes + financing expenses) / (Total assets - interest-free liabilities) average \* 100

Equity ratio, % = Total equity / (Total assets - prepayments received) \* 100

Gearing, % = (Interest-bearing debt - liquid funds) / Total equity \* 100

Net interest-bearing debt = Interest-bearing debt - liquid funds

Earnings per share, basic, EUR = Profit attributable to owners of the parent company / Average number of shares during the period

Earnings per share, diluted, EUR = Profit attributable to owners of the parent company / Average number of shares during the period, diluted

Operating profit (EBIT) = Operating profit is the net of revenue plus other operating income, plus gain/loss on finished goods inventory change, minus employee benefits expense, minus depreciation, amortisation and impairment and minus other operating expense. Foreign exchange gains or losses are included in operating profit when generated from ordinary activities. Exchange gains or losses related to financing activities are recognised as financial income or expense.

Earnings before interest, taxes, depreciation and amortisation (EBITDA) = Operating profit + depreciation + amortisation + impairment losses

## ACCOUNTING POLICIES

This Interim Report is prepared in accordance with IAS 34 'Interim Financial Reporting' and should be read in conjunction with Afarak's financial statements for 2018. Afarak has applied the same accounting principles in the preparation of this Interim Report as in its financial statements for 2018, except for the adoption of new standards and interpretations that become effective in 2019. The changes did not have material impact on the Interim Report.

The preparation of the Interim Report in accordance with IFRS requires management to make estimates and assumptions that affect the valuation of the reported assets and liabilities and other information, such as contingent liabilities and the recognition of income and expenses in the income statement. Although the estimates are based on the management's best knowledge of current events and actions, actual results may differ from the estimates.

The figures in the tables have been rounded off, which must be considered when calculating totals. Average exchange rates for the period have been used for income statement conversions, and period-end exchange rates for balance sheet.

The Interim Report data are unaudited.

Average share price = Total value of shares traded in currency / Number of shares traded during the period

Market capitalisation, million = Number of shares \* Share price at the end of the period

## **FORWARD LOOKING STATEMENTS**

This report contains forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of forward-looking terminology, including the terms “believes”, “expects”, “intends”, “may”, “will” or “should” or, in each case, their negative or other variations or comparable terminology. By their nature, forward-looking statements involve uncertainty because they depend on future circumstances, and relate to events, not all of which are within the Company's control or can be predicted by the Company.

Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Actual results could differ materially from those set out in the forward-looking statements. Save as required by law (including the Finnish Securities Markets Acts (746/2012), as amended, or by the Listing Rules or the Disclosure and Transparency Rules of the UK Financial Services Authority), the Company undertakes no obligation to update any forward-looking statements in this report that may occur due to any changes in the Directors' expectations or to reflect events or circumstances after the date of this report.
